## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, 10-11, 21-28, drawn to using a purified gluten oligopeptide for diagnosing Celiac Sprue in an individual, with special technical feature of the oligopeptide and detecting the presence of antibodies that specifically bind to the oligopeptide.

Group II, claim(s) 1-7 and 9, drawn to drawn to using a purified gluten oligopeptide for diagnosing Celiac Sprue in an individual, with special technical feature of determining whether an oligopeptide would stimulate agglutination of anti-gliadin antibodies, anti-tTGase antibodies or combination thereof from the individual.

Group III, claim(s) 12-17, 19-20, drawn to drawn to using a purified gluten oligopeptide for diagnosing Celiac Sprue in an individual, with special technical feature of the oligopeptide as recited in SEQ ID No.12.

Group IV, claim(s) 12-16 and 18, drawn to with special technical feature of determining whether an oligopeptide of SEQ ID No. 12 would stimulate agglutination of anti-gliadin antibodies, anti-tTGase antibodies or combination thereof from the individual.

According to 37 CFR 1.475 regarding unity of invention:

(a) An international and a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention"). Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a

Art Unit: 1641

contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

(b) An international or a national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories:

- (1) A product and a process specially adapted for the manufacture of said product; or
- (2) A product and a process of use of said product; or
- (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or
- (4) A process and an apparatus or means specifically designed for carrying out the said process; or
- (5) A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process.

If an application contains claims to more or less than one of the combinations of categories of invention set forth in paragraph (b) above, unity of invention might not be present. Furthermore, the determination whether a group of inventions is so linked as to form a single general inventive concept shall be made without regard to whether the inventions are claimed in separate claims or as alternatives within a single claim.

The above invention in Groups I-IV, each falls into the category of (b)(2) of 37 CFR 1.475, namely product and a process of use said product. Applicant is entitled to elect one group for examination under 37 CFR 1.475.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1641

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
